What's ValcaNonica?

Valcanonica is an association founded by a group of local people that love their territory and want to promote social activities in the ligurian outback. Our goal is to highlight all the uniquenesses that our territory has to offer, especially focusing our attention on the local traditions, the history, the monuments, the particularities of the ecosystems, the local farm products and food specialties. Valcanonica values and supports the local traditional activities and businesses by including them in our itineraries, and connecting them to global product/service demand. Valcanonica sticks to the ARCI's values.

What's the national day of the small museums?

The association of the small museums has picked this day to help the small museums to have one more chance to promote them, by setting the institutions and media's attention in order to attract more visitors.
